

From 1 June 2015, all ship calls for European ports have to be reported electronically!

For national implementation of Directive 2010/65/EU the following reporting domains have to be declared electronically by using the National Single Window Germany or connected services. For starting the reporting process an application for a Visit ID for a port visit or a Transit ID for transiting the Kiel Canal has to be conducted. This concerns the following reporting formalities:

- Notification of Arrival and Departure of a vessel
- Port Notification
- Dangerous Goods Notification upon Arrival and Departure
- Security Notification
- Waste Notification
- Port State Control Notification
- Notification of the Maritime Declaration of Health
- Immigration Notification
